Always!

- Read all instructions before installing any Havis-Shields Equipment Corp products.
- Check for obstructions (Wire, brake lines, fuel tank, etc.) before drilling any holes!
- Use hardware provided with install kit
- For product support: visit the Install Instructions Section of our website at <http://havis.com/Installation/Installation.html>, email technicalsupport@havis.com or call 1-800-524-9900.

Installation:

Position frame assembly as shown. Trunk liner does not have to be removed, but you may want to cut it as needed to improve access for routing wires.

Top frame mount attaches to the trunk gasket mounting flange. Drill three holes with a 3/16" (.187") drill bit.

Bottom frame mount attaches to the trunk side floor. Drill three pilot holes with a 1/8" (.125") drill bit.

* Always check under floor before drilling *

Attach top frame with three (3) - 10/32" x 1/2" machine screws and keps nuts.

Attach bottom frame with three (3) - # 10 x 3/4" sheet metal screws.

Driver side Trunk Side Mount complete.

Install electrical components as desired.
